## Job Factory Data Collection and Production Control

*There are four methods for entering actual times and costs into a job.*

1. Copy Estimate to Actual by nominated department
   By just pressing one button the nominated estimates can be copied to actuals.
   These can easily be manually adjusted, deleted or added to.
   This can be done at any time prior to costing.

2. Time Sheets
   - Employees profile defaults set up.
   - Set standard hours, work actions and pay rates.
   - Updates Job costing, Employee times, Machine hours and number of Runs.

3. Touch Screen and Barcoding
   - Employees profile defaults set up.
   - Touch screen work areas set-up.
   - Touch screen job operation set up.
   - One employee can have more than one simultaneous operation.
   - Updates Job costing, Employee times, Machine hours and number of Runs.
   - Updates the Notes area of the job for quick job status.
   - Works in real time on the LAN.
   - Easy job number entry via barcodes on the job bag.

4. Manual
   - All costs can be added manually to all jobs.
   - Updates job actuals only.

Reporting for Production Control and Costs
All reports can be tailored to suit your needs using our Crystal Report Management module. We already have a substantial number of reports that can be drawn from.

E.g. Work in Progress for production control.
